

Going Global 2020

Social Distancing Edition

Continuing the conversation

Following the cancellation of this year's physical conference we would like to continue to maintain dialogue, share relevant content and encourage our audiences to engage with us more through our digital platforms and social media channels.

We have curated *some* of the planned content from the GG2020 programme which has been translated into digital means including a range of digital content such as Webinars; Blog posts; Posters and Live Panel Debate interactions throughout the GG month of June shared via our social media and global channels.

We have drawn upon a short-list of trusted contributors and partners to develop a content planner of interesting and pertinent content related to the GG2020 theme of the Global Learner.

Going Global is the world's largest open conference for leaders in international education to debate the future of further and higher education.

- Providing a unique platform for knowledge sharing;
- Connecting local, national, regional and global agendas;
- Supporting global thought leadership.

Be the first to hear about all our planned activities by signing-up to the [Going Global newsletter](#) and following us on [Twitter](#) or Join in the discussion by attending our [live events](#).
